Duration Estimate	30 Minutes

navify POC Operations 3.4 released globally

Executive Summary

navify POC Operations V3.4 refines and enhances the functionality provided by **navify** POC Operations V3.3 and introduces the Advanced Operator Management module for (controlled) commercial rollout. It also serves as the functional replacement for the **cobas IT** 1000 frontend, frees the **cobas POC** IT bundle of products from the dependency on Microsoft Silverlight as it is built on HTML 5. It incorporates frontend functionality as well as the backend previously provided by the **cobas IT** 1000 application backend.

Units Concerned

navify POC Operations V3.4 can be installed where there is currently no version of **navify** POC Operations, **cobas infinity** POC or **cobas IT** 1000 installed or as a direct upgrade to released versions higher or equal to **cobas IT** 1000 V2.10.00 and **cobas infinity** POC 1.0.1, older versions need to be updated to **cobas IT** 1000 V2.10.00 or newer first. Thus far, **navify** POC Operations V3.4 is available in English (out of box), language packs for further languages will be released and published as soon as possible.

Complaint Handling

Log complaints and inquiries on the following parts as applicable:

Global Material Number	Description
09159053001	cobas infinity POC core license - 2.x
10170280001	navify POC Operations - 3.x

Subject

For a list of

- new features
- changes and solved issues
- released items
- limitations
- known open issues and workarounds
- constraints see the attached Software Release Notes documents or a summary of them at <https://rdkm.roche.com/search/products/335741/backgrounds/494240>.

Release notes are for Roche internal use only and must not be shared with the end-customer directly.

navify POC Operations V3.4 is supported on the Google Chrome and Microsoft Edge browsers for the frontend on PCs and on iPadOS and Android for mobile platforms. It is supported on Windows Server 2016, Windows Server 2019 and Windows Server 2022 for the backend. Existing Caché license keys for **cobas infinity** POC and **cobas IT** 1000 must be upgraded to InterSystems IRIS for Health 2024.1 compatible licenses in order to install **navify** POC Operations V3.4.

The adapter used by the **cobas infinity** POC mobile and **cobas infinity** POC tablet mobile apps is not compatible with **navify** POC Operations and must not be installed on **navify** POC Operations servers. Consequently, the use of the **cobas infinity** POC mobile and **cobas infinity** POC tablet mobile apps is not supported with **navify** POC Operations.

cobas b 123 and **cobas b** 221 instruments connected to **navify** POC Operations V3.4 in conjunction with **cobas infinity** POC remote access cannot be connected to the **cobas** bge link software in parallel. The **cobas** bge link server component cannot be active on the server hosting the **cobas infinity** POC remote access instrument connectivity if **cobas b** 221 instruments are connected to **cobas infinity** POC remote access.

Risk Statement

No patient or diagnostic test results are affected and a medical risk to patients and users can be excluded.

Training

As **navify** POC Operations V3.4 technologically is a continuation of **cobas infinity** POC V2, **cobas infinity** POC V2 content remains valid for **navify** POC Operations V3.4, the following Coached Distance Learning training courses are already available in Cornerstone or will be newly available in Cornerstone shortly:

- **cobas infinity** POC V2.0 Operator Training (standardized)
- **cobas infinity** POC V2.0.1 Delta Operator Training (standardized)
(this training course also covers the differences between V2.0.0 and V2.0.1 in terms of service topics which in total are not extensive enough to warrant a separate training course)
- **cobas infinity** POC V2.1 Delta Operator Training (standardized)
(this training course also covers the differences between V2.0.1 and V2.1 in terms of service topics which in total are not extensive enough to warrant a separate training course)
- **cobas infinity** POC V2.2.x Delta Operator Training (standardized)
(this training course also covers the differences between V2.1 and V2.2.2 in terms of service topics which in total are not extensive enough to warrant a separate training course)
- **cobas infinity** POC V2.3 Operator Training Update (standardized)
(this training course also covers the differences between V2.2.2 and V2.3 in terms of service topics which in total are not extensive enough to warrant a separate training course)
- **navify** POC Operations V3.0 Operator Training Update (standardized)
(this training course also covers the differences between V2.3 and V3.0 in terms of service topics which in total are not extensive enough to warrant a separate training course)
- **navify** POC Operations V3.1 Operator Training Update (standardized)
(this training course also covers the differences between V3.0 and V3.1 in terms of service topics which in total are not extensive enough to warrant a separate training course)
- **navify** POC Operations V3.2 Operator Training Update (standardized)
(this training course also covers the differences between V3.1 and V3.2 in terms of service topics which in total are not extensive enough to warrant a separate training course)
- **navify** POC Operations V3.3 Operator Training Update (standardized)
(this training course will also cover the differences between V3.2 and V3.3 in terms of service topics which in total are not extensive enough to warrant a separate training course)
- **navify** POC Operations V3.4 Operator Training Update (standardized)
(this training course will also cover the differences between V3.3 and V3.4 in terms of service topics which in total are not extensive enough to warrant a separate training course)
- **navify** POC Operations Basic Operator Training Self Learning
(this training course mirrors the customer training course in RDA and is an operator training course having a reduced level of details in comparison to the **cobas infinity** POC V2.0 Operator Training (standardized) course; it is based on V3.1)
- **cobas infinity** POC V2.0 Service Training (standardized)
